SUMMARY

UI/UX Designer and Frontend Developer focused on intuitive, functional digital experiences. I enjoy understanding requirements through discussion and collaboration, shaping flows. Working with Figma and React.js, I connect design intent with frontend execution to deliver solutions.

PROJECTS

1. Concept School App

Role : UI/UX Designer

- Easy availability of academic details for students, teachers, and parents.
- Better communication and usability with the clean and school-themed interface.

2. WishKart (E-commerce Site)

Role : UI/UX Designer

- Better product discovery and checkout. This makes it easier and faster to shop.
- Improved visual consistency for a smooth shopping experience.

3. Thinkuni

Role : UI/UX Designer

- Enhanced user experience by integrating several categories into one domain.
- Facilitated the discovery of information through the provision of a simple interface.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

2023 - 2027

Bannari Amman Institute of Technology

CGPA : 7.76

INTERNSHIP

1. NSIC – Full Stack Intern

2024

- Involved in frontend development and UI/UX design
- Applied and learned the basics of React.js and created reusable frontend components

2. Zaalima Development - UI/UX Design Intern

2025

- Engaged in UI/UX design projects related to designing responsive interfaces.
- Worked along with the design team to increase visual consistency.
